with

REFRIGERANTS

Refrigerant R-22

- Dominant refrigerant in residential and commercial air conditioning
- Subject to reduced production, which will end in 2020
- The use of R22 is allowed until the R22 supply is exhausted

AIR CONDITIONING

Refrigerant 410A

- Similar properties to R-22 in residential and commercial air conditioning
- Blend of R32, R125
- 410A is the leading HFC refrigerant for replacing R22
- Higher cooling capacity
- Significantly higher pressure than R22

REFRIGERATION

Refrigerant 404A

- Blended for low and medium temperature refrigeration
- For use in supermarkets and refrigeration equipment
- Blend of R125, R143A, R134A

Refrigerant 407C

- Closest property to match R-22 in a/c retrofit projects
- Can be used in medium temp R-22 refrigeration systems
- Blend of R32, R125, R134A
